PROFIL

I am a recent **Informatics Engineering graduate from Universitas Pancasila (GPA 3.70)**, specializing in software engineering with advanced skills in website development. I am proficient in—and eager to further develop my skills in programming languages such as C++, JavaScript, PHP, Golang, and Java (OOP), and I am skilled in automation using N8N and Docker for project deployment. I possess strong communication skills, the ability to find effective solutions to complex problems, and excellent time management capabilities; I am a team player who performs well under pressure and is highly driven to achieve goals. Furthermore, I enjoy new challenges and am ready to learn new things.
